## Report and Grade Justification

The following information will be included in the Training Provider Report that BCS will send back to the training provider to explain the key reasoning behind the grading decision. You should provide summary detail in the comments section. This will be particularly important where evidence was weak or lacking.

As well as helping the training provider to understand the reasons for the grading decision, BCS are interested in feedback that will help them to work with the training provider to:

- identify areas where the training provider is demonstrating best practice;
- identifying and making recommendations on opportunities for improvement;
- addressing areas of concern and recommending solutions.

| Competence                                                                                                                              | Insufficient Evidence    | Pass                     | Significantly Above                 |
|-----------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|-------------------------------------|
| <b>The 'What'</b><br>What the apprentice has shown they can do                                                                          | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| <b>The 'How'</b><br>The way in which the work has been done                                                                             | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| <b>The 'With Whom'</b><br>The personal and interpersonal qualities the apprentice has brought to internal and/or external relationships | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

### For a pass:

Each of the three sets of criteria must demonstrate at least the expected (minimum requirement) level of quality

### For a merit:

The 'What' has to be significantly above the level of quality and one of either the 'How' or the 'With Whom' has to be significantly above the level of quality expected

### For a distinction:

Each of the three sets of criteria must be significantly above the expected level of quality

## Final Grade

## Report and Grade Justification

**PROVE IT with RITTech professional registration!**

**Congratulations from the team at BCS on passing your end-point assessment.**

As a digital apprenticeship end-point assessment is aligned to the [SFIA framework](#), the global skills and competency framework for the digital world, you are now entitled to obtain RITTech, the professional registration for IT Technicians. By doing so, and using the post-nominals after your name, you will be part of a network of IT professionals, who can prove they have a recognised level of professional competence and are committed to your ongoing continuous professional development.

**Claim your fantastic membership and RITTech offer!**

In recognition of your fantastic achievement, BCS is offering you one year's RITTech registration along with BCS professional membership (MBCS) at the significantly discounted rate of £30 (£25 for MBCS membership and £5 for RITTech registration) - that's a huge annual saving of £134.

After the one-year discounted period ends, you will need to pay the standard rates of annual Professional membership subscription and RITTech registration in order to keep both.

If your employer is part of a BCS organisational scheme, find out if they will cover your membership subscription and RITTech registration.

To take up this fantastic offer, please go to: [bcs.org/beyondepa](https://www.bcs.org/beyondepa) and follow the online instructions.

If you have any queries relating to this offer contact [RITTech@bcs.uk](mailto:RITTech@bcs.uk)

## Report and Grade Justification

### Apprentice Feedback

#### Summary

Aaron has made outstanding progress as an apprentice. He has had a substantial impact in his workplace, playing an instrumental role introducing new analysis tools and reporting methods. He has received awards in recognition of his contribution to the work of the trust, helping introduce reports that provide greater granularity and opportunities for useful insights.

The employer was full of praise for Aaron. He was 'enthusiastic, energetic and completely driven to succeed', and was very keen to learn and put his knowledge into practice. The reference provided additional context for his work, describing some of the challenges he had faced and some of the positive impacts of his work. The employer described Aaron's 'advanced' use of SQL, involving functions, views, and 'loops'. The reference also further evidenced that Aaron was a pioneer in use of statistical analysis and PowerBi reporting. The reference was therefore supported a significantly higher evaluation in the What and How competences. The With Whom was also evidenced, with examples of collaboration with colleagues, presenting to different levels of stakeholders, and supporting 'customers'.

The portfolio contained several projects which demonstrated Aaron's progression from data collection and cleansing to production of advanced, interactive dashboards. The level of detail with which he described his work evidenced that he independently researched and introduced new tools and methods. Aaron also used a range of visuals across his portfolio: Statistical graphics, plots, Information graphics, tables and charts. He also described interactions with colleagues and stakeholders, evidencing a range of behaviours in the With Whom competence.

The synoptic project was carried out to an excellent standard. Aaron extracted data using SQL and produced a range of graphs and charts summarising his analysis. He produced actionable insights well considered conclusions.

Aaron communicated well at interview, and was able to describe his work in detail. He explained that there was little prior use of statistics in the trust's reports, and he described how he was introducing new methods. Aaaron also demonstrated Drill though functionality in PowerBi providing effective self-service to a granular level. He discussed his use of SQL views, which were easier to connect to the database and still change the logic, and described use of programming techniques in his scripting.

Aaron has demonstrated that he has taken the initiative in several areas – statistical analysis, PowerBi dashboards, and SQL programming. His interest in programming and working with data, and his proactive approach has enabled him to make a substantial impact on reporting in the trust.

The grade is Distinction.

## Report and Grade Justification

### Employer Feedback

#### Reference

The employer reference was written by Neal Jones, Business Intelligence Development Lead. It discussed work in the portfolio, and gave feedback about the quality and impact his work. Aaron 'had 'completely exceeded' every expectation. The report evidenced that Aaron was instrumental in introducing and developing tools and methods in his department, including R studio, PowerBi, and different implementations of SQL. For example, the employer explained that Aaron had collaborated on an 'Integrated Performance Report' using data flows, which made a manual process redundant. This was a 'milestone moment' for the Trust.

All the standards in the What competence were evidenced by the reference. For example, for the Present standard, the employer described meetings with a pharmacist, project leads, and dashboard presentations at Change Advisory Board meetings. The employer described Aaron using guidance documents to work securely. Aaron had been 'exemplary' in applying data security procedures in his work. Apply Policies. For the Query standard, the employer stated that Aaron's SQL programming was at a higher standard than some of the permanent, senior analysts. The employer described Aaron's understanding of data architecture.

The reference provided extensive evidence for proficiencies in the How competence. The employer described Aaron taking on projects with the same level of independence as other members of the team, with an 'analytical and methodical' approach to problem solving. An example included describing Aaron's work on the trust's Integrated Performance report, which involved collecting the data from different users, and development of SQL objects and queries to create a data flow based on this collected data. From this he developed a stored procedure to automate the build process.

There was also substantial evidence for several behaviours in the With Whom competence. Aaron was an 'excellent' communicator with staff at different levels, engaging with clinicians on a daily basis. The employer described Aaron as a 'constant support' to others in his team. He enjoyed demonstrating and explaining technical solutions to colleagues, and welcomed their advice. His input had helped others in his team understand and plan tasks better. Aaron had also always volunteered for responding to ad-hoc requests and always spoken to the requestor for clarification. The chair of the meetings with customers had fed back that no one wanted to follow on from his work as it was such a high standard 'technically and visually'. Also, Aaron had 'absolutely nailed' a presentation to the Executive Team about his experience as an Apprentice.

The employer held Aaron in high esteem, stating that his 'passion, enthusiasm, energy' was 'immense'. He was 'absolutely thrilled' with Aaron's performance and had created a permanent Band 5 post for him. Aaron had received two awards: NWISDN Informatics Apprentice of the Year 2021, and 'Digital Stars Award for Rising Star' from UK Cancer Trusts.
